

# Policy for Quality, Health, Safety and Environment

At Ørsted, our vision is a world that runs entirely on green energy. Sustainability is at the core of our DNA and we are committed to operate our business in a sustainable way. At Ørsted we incorporate quality, health, safety and environmental considerations in all our decisions and actions.

## Strong commitment to QHSE

To protect our people and assets, drive efficiency and support our sustainability ambition, we set high standards for Quality, Health, Safety and Environment (QHSE). We actively pursue a world class way of working, seeking maximum business impact and high efficiency in the way we work.

## Policy

Through our QHSE operations, we want to support a sustainable business performance:

**Quality** - Always deliver on customer and stakeholder commitments, whilst continuously optimising our efficiency.

**Health** - Constantly strive towards a strong health performance and ensure the well-being of our people.

**Safety** - Manage risks to be as low as reasonably practicable, aiming to keep our people safe above all.

**Environment** - Minimise our environmental impact throughout the full asset lifecycle and across our operations.

## What we do

- Base decisions on relevant and valid data to ensure robust plans and execution.
- Have and follow adequate and clear processes to deliver consistent value, according to customer expectations.
- Assess risk and act accordingly caring about people, the planet and business results.

- Grow a culture of continuous improvement, where we learn from successes, failures, incidents and observations.
- Influence our supply chain and set targets for QHSE performance and improvement.

## Compliance and enforcement of policy

We are all responsible for adhering to this Policy and to follow supporting corporate standards, procedures and processes.

We all play an active role in making a strong QHSE behaviour a part of Ørsted's culture. Everyone working for Ørsted must assume responsibility for QHSE, for delivering what is required and for continuously improving our way of working.

Furthermore, we will ensure compliance with any prevailing legislation, regardless of where we operate and apply recognised norms and standards relevant to the scope of work.
