

# Moor Vannin Offshore Wind Farm Community Update March 2024

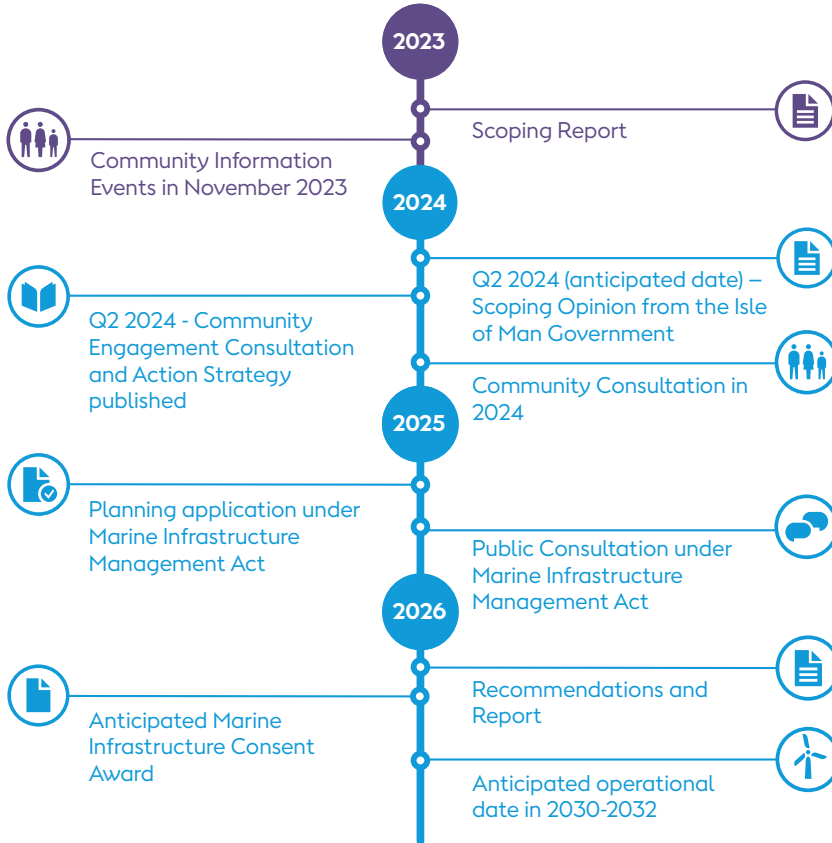

In November 2023 we held community information events across the Island to introduce the Moor Vannin project, the Isle of Man's first wind farm offshore, and to invite feedback on our early-stage proposals. We are grateful to everyone who joined us to share their valuable insights. We invite you to read our Information Events Summary Report in our Document Library online by accessing our website: [orsted.im/mooirvannin](https://orsted.im/mooirvannin).

This report provides a summary of the feedback we received - all of which is now being considered by our team. Our website also features the latest project news, including our successful deployment of a wave measurement buoy and a subsea temperature monitoring device off the east coast of the Island.

Looking ahead, we will launch our community consultation later this summer. In support of this there will be further consultation events at venues across the Island where you can learn how our proposals have evolved to consider your feedback. We will provide further information regarding these events later in 2024. To ask any questions you may have on the Moor Vannin Offshore Wind Farm, or share any further feedback, please get in touch using the contact details on the back of this postcard.
